SUMMARY

As a junior frontend developer, I am passionate about creating responsive, user-friendly websites and applications that are visually appealing and provide an excellent user experience. I am always eager to look for and learn new technologies or techniques to improve my skills, workflow appeal of my work and knowledge in the frontend/fullstack field.

EXPERIENCE

10/2022 – 04/2023

CODIBLY
Junior Frontend Developer

I have worked on a web application which was a platform to manage all energy resources in one place (PV farms etc.). Delivered a lot of new features and fixed a ton of bugs. Took part in AGILE/SCRUM methodologies

- Deliver new features according to requirements and design
- Code reviews and bug-fixing
- Take part in SCRUM activities

07/2022 – 10/2018

CODIBLY
Intern Frontend Developer

I have worked on a so called "home owner" web application which helped the user to monitor and manipulate usage of his solar panels and all the statistics related to that. Delivered quite a few features but focused on bug-fixing mainly.

- Deliver new features according to requirements and design
- Bug-fixing
- Take part in SCRUM activities
